ENGINEERING
PRECISION THAT
Builds trust

ABOUT US

WHO WE ARE

Maruti Engineers is a professionally managed engineering and fabrication company established in 2015. We specialize in precision metal processing and fabrication services, catering to diverse industrial requirements with a strong focus on quality, accuracy, and customer satisfaction. Through consistent performance and dependable solutions, we have earned the trust of our clients.

WHAT WE DO

We provide complete fabrication support using advanced machinery and skilled workmanship, including CNC laser cutting, bending, laser welding, argon welding, and rolling works. We handle both small and large-scale jobs with equal attention to detail and specialize in custom job work as per customer drawings or samples, ensuring precise specifications and high-quality output.

OUR STRENGTHS

- Established and experienced since 2015
- Modern machines and updated technology
- High precision and superior finish
- Skilled workforce and strict quality control
- Timely delivery and competitive pricing

OUR COMMITMENT

At Maruti Engineers, we are committed to delivering reliable engineering solutions that meet industry standards and exceed customer expectations. Every project reflects our dedication to precision, durability, and excellence.

CNC LASER CUTTING MACHINE

Capacity: Up to 25 mm

CNC LASER CUTTING MACHINE

Advanced CNC laser cutting delivers high precision, clean edges, and accurate results for a wide range of metal fabrication needs.

- Cutting capacity up to 25 mm
- High accuracy and smooth edge finish
- Suitable for complex and custom designs
- Consistent quality and fast turnaround

BENDING SERVICES

Our bending services provide precise and uniform metal forming with accurate angles, smooth curves, and consistent quality

- Bending capacity up to 10 mm
- Accurate angles and clean bends
- Suitable for industrial and fabrication needs
- Custom bending as per drawings

BENDING SERVICES

Capacity: Up to 10 mm

LASER WELDING SERVICES

Capacity: Up to 5 mm

LASER WELDING SERVICES

Advanced laser welding ensures strong joints, minimal heat distortion, and a clean, precise finish..

- Welding capacity up to 5 mm
- Strong and precise weld joints
- Minimal distortion and heat impact
- High-quality surface finish

ARGON WELDING SERVICES

Argon welding delivers clean, strong, and corrosion-resistant joints, ideal for stainless steel and aluminum components..

- Clean and smooth welding finish
- High strength and durability
- Suitable for stainless steel and aluminum
- Reliable and consistent quality

ARGON WELDING SERVICES

Capacity: Up to 10 mm

ROLLING MACHINE SERVICES

Capacity: Up to 5 mm

ROLLING MACHINE SERVICES

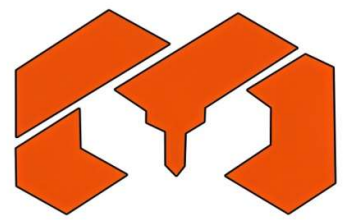

Metal rolling services up to 5 mm thickness, delivering smooth curves, accurate radii, and uniform shapes..

- Rolling capacity up to 5 mm
- Smooth and uniform curves
- Accurate shape and finish
- Custom rolling as per requirement

Engineering That Delivers Confidence

responsibility, and

Every project at Maruti Engineers is driven by precision, responsibility, and technical excellence. From accurate cutting to flawless welding and forming, we focus on delivering dependable results that support long-term performance.
